

What is claimed is:

1. A method of manufacturing lampshades, comprising:
 - having a plurality of end-users each select a graphical design for a lampshade;
 - printing a plurality of the selected graphical designs together on a single substrate;
 - cutting out individual sections of the substrate, wherein the sections correspond to the selected graphical designs; and
 - forming lampshades from the individual cut out sections of the substrate.
2. The method of claim 1, wherein each end-user selects the graphical design from a menu of graphical designs.
3. The method of claim 2, wherein the menu is displayed on a computer screen.
4. The method of claim 3, wherein the graphical designs are selected over the Internet.
5. The method of claim 1, wherein the substrate is vinyl.
6. The method of claim 1, further comprising:
 - laminating the substrate prior to forming the lampshades.
7. The method of claim 1, wherein each of the graphical designs are printed together with a unique customer identifier.
8. The method of claim 7, wherein each unique customer identifier corresponds to one of the plurality of end-users.
9. The method of claim 1, further comprising:
 - having each of the plurality of end-users select a shape for the lampshade; and
 - cutting out the individual sections of the substrate in shapes corresponding to the selected shapes of the lampshades.

10. The method of claim 9, wherein at least one of the shapes is rectangular, thereby forming a cylindrical lampshade.
11. The method of claim 9, wherein at least one of the shapes is C-shaped, thereby forming a truncated conical-shaped lampshade.
12. The method of claim 1, wherein the graphical designs are printed after they have been selected by the end-users.
13. The method of claim 1, wherein a degree of light transmission through the substrate is selected when selecting the graphical design.
14. The method of claim 1, wherein the graphical designs are printed on the single substrate at selected intervals of time.
15. The method of claim 2, further comprising:
 - having the end-users individually upload and modify the graphical designs.
16. The method of claim 1, further comprising:
 - providing the lampshades to the end-users.
17. The method of claim 16, wherein providing the lampshades to the end-users comprises:
 - shipping the lampshades to the end-users.
